

NYC DOE POP-UP VACCINE CLINIC

Thank you for partnering with the city's vaccination campaign and helping us bring a vaccine clinic to newly-eligible 5-11 year-olds in your community! By holding clinics in NYC public schools, we are able to offer children and their families a convenient, trusted site to get vaccinated and be safe - starting Monday, November 8!

What the Clinic Offers:

- Walk-up, no-cost vaccination for 5-11 year-olds with the FDA and CDC-authorized Pfizer vaccine

How the Clinic Operates:

- A pop-up clinic team of 5 staff will arrive on-site 30-minutes prior to the clinic start time (either 7am or 12:30pm) and setup in the designated space. Schools should provide one or two tables and 10 chairs. The clinic team will bring the vaccine and supplies.
- Children aged 5 to 11 years old can present, no appointment necessary, and receive the vaccine if accompanied by a parent or guardian and parent/guardian consent is given
- The team will schedule the patient's 2nd-dose appointment before they leave at a site of their choosing, and assist with any questions the parent/guardian may have

What the Clinic Needs From the School

To have an efficient, easy-to-access clinic for eligible, we are asking the following of our school partners:

- Access to the school building and the designated space, which includes electric outlet access for the mobile vaccination fridge, HVAC or the ability to open windows/doors for airflow, and (if possible) a one-way patient flow via separate entry and exit points
- Restroom access for staff
- A point of contact in case there are building access or other needs day-of
- Please communicate information about the clinic, its date and time, the process and consent needs to parents/guardians

Thank you!

Please reach out along the way with any questions or additional needs and again, thank you!
